Electrical, Computer,
and Software
Engineering
Students' Society

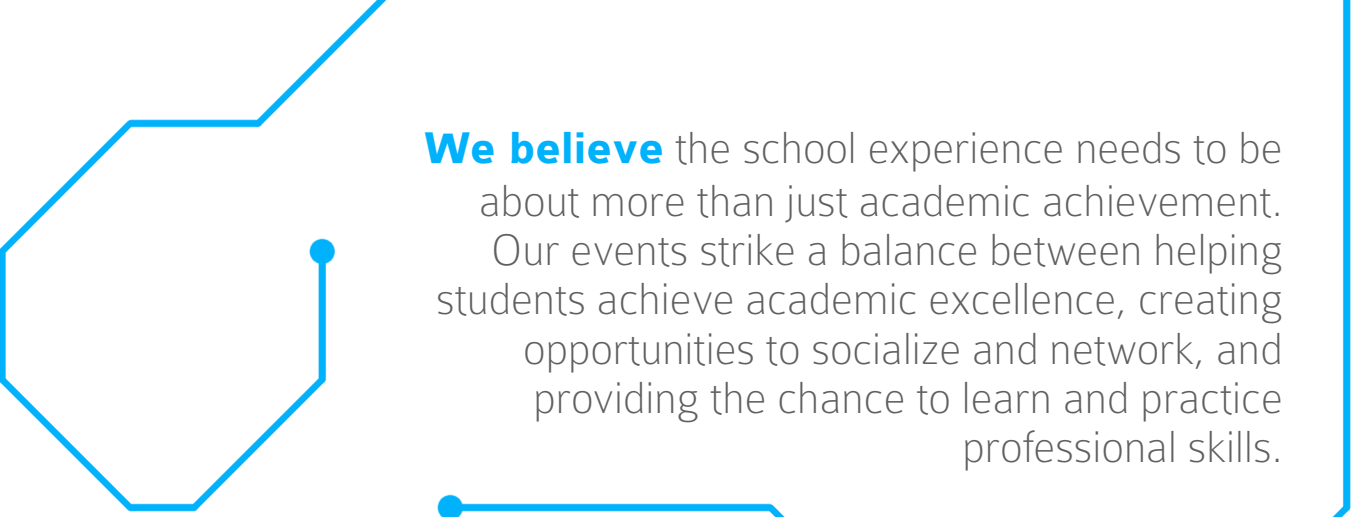

Sponsorship Package

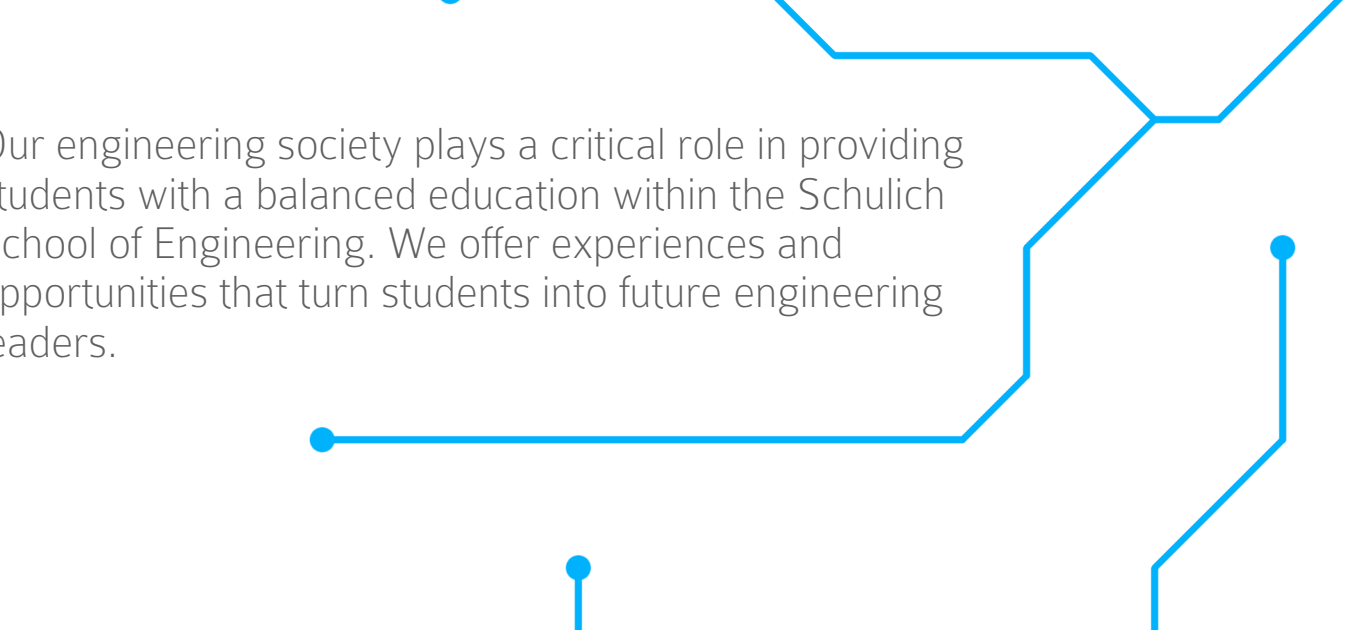

We are the Electrical, Computer, and Software Engineering Students' Society at the University of Calgary's Schulich School of Engineering, representing over 700 undergraduate students. We are a student run non-profit organization that strives to improve the university experience for students in our department by providing academic support, professional development opportunities, and social events such as mixers and charity fundraisers. Our club's diverse events allow students to develop strong relationships with their peers, professors, and industry professionals.

We believe the school experience needs to be about more than just academic achievement. Our events strike a balance between helping students achieve academic excellence, creating opportunities to socialize and network, and providing the chance to learn and practice professional skills.

Our engineering society plays a critical role in providing students with a balanced education within the Schulich School of Engineering. We offer experiences and opportunities that turn students into future engineering leaders.

What we do

Educating First Year Students

In addition to providing services for all our members, we also work to help first year engineering students better understand what electrical, computer, and software engineering are all about. Through education and events such as industry night and Frosh Week, we work to ensure students are well informed when they choose which engineering discipline they will study.

Building a Community

We maintain two homerooms which are common spaces for students in our department to socialize, collaborate, and study together. Additionally, we run social and networking events to foster the kind of community that will be meaningful to our students.

Social Media is our most prominent way of reaching out to all of our students. We actively maintain a website and a Facebook page, enabling us to inform students of our events and allowing them to communicate with us freely.

Engg Week

The premier social event of the school year for engineering students. Engg Week is a 7 day friendly competition between the different engineering departments that serves to build a strong community and pride for our faculty.

Why Invest

Make Your Mark

Recognition for your contribution doesn't end with the academic year. We make an effort to recognize our sponsors permanently as part of the environment they help create. By acknowledging sponsors on our social media, in Engg Week movie credits, and by displaying your name or logo on a banner in our homeroom, we make sure that your contribution will be seen by students for years to come.

Micro Career Fairs

We offer our sponsors the opportunity to participate in micro career fairs, where they can come to the university for a day and talk with students about what they do. Students are able to talk one-on-one with potential employers, drop off resumes, and practice their networking skills.

Reach the Right Students

As a world renowned engineering school, the Schulich School of Engineering is educating bright students who think outside the box to solve everyday problems. We are in a unique position to work with organizations that wish to reach electrical, computer, and software engineering students directly. By contributing to our society, you are impacting the student experience in a way that is highly visible to the individuals you are trying to reach.

While all contributions are greatly appreciated, donations of **\$200 or more** will give our sponsors the following benefits:

Your company logo displayed on our website and other social media

Your company name and logo on a banner hanging year round in our homeroom

Invitations to all micro career fairs

Your company logo displayed in our Engg Week movie credits and on all of our event apparel

Thank You
